

Laboratory semi-central workbench with frame

→ GENERAL PROPERTIES

- Steel-tube upgrade frame 50x50 and 50x80 mm of high load capacity, galvanized and epoxy powder coated heavy duty RAL 7047
- High load capacity and stability
- Units on castors (optional) can be cupboards, drawer units or combination
- Supply bridge with 220V socket (PC network and telephone- optional)
- Possibility of water, outflow, gas, vacuum, demineralised water etc.
- Simple approach to service installation area
- Metal shelves for reagents - plastic-coated, height adjustable
- Single module sink at the front of workbench, laboratory tap H/C water, eye rinsing unit (optional) and under bench moisture-proof melamine film coated chipboard cupboard
- According to EN 13150
- Worktops made of: technical ceramic material, epoxy, HPL, stainless steel, polypropylene or compact, according to workbench use

Laboratory semi-central workbench with frame

→ STANDARD WORK BENCH DIMENSIONS

	SEDENTARY WORK	STANDING WORK
high	750 (1700)	900 (1700)
depth	1300	1300
	1600	1600
width	1500	1500
	1800	1800
	2100	2100
	2400	2400
	3000	3000
	3300	3300
	3600	3600

→ STANDARD WORKTOPS

TECHNICAL CERAMIC MATERIAL
High mechanical and chemical resistance, fireproof.

POLYPROPYLENE
High chemical resistance.

EPOXY
High chemical resistance.
Possibility of junctions with no transition (for microbiology).

STAINLESS STEEL
Worktops for demanding mechanical and moisture conditions (wash-rooms).

COMPACT
High mechanical strength and resistance to high temperatures.
Good chemical resistance

HPL
Good chemical resistance and economical performance.
